• PERSONAL PRINTS

If you need something 3D printed that isn't made and sold by us regularly you can send in a request over the phone or through our website.

• BUSINESS RELATED PRINTS

If your business is in need of plastic parts or a diagram you can send in a request over the phone or through our website.

ABOUT US AND OUR PRODUCTS.

At Sidote's Plastics we have a fantastic group of employees who are passionate and hard working individuals. We also have a wide variety of colored filament that comes in PLA, for a standard print that comes at a low price point, is rigid, strong, and can survive a short drop, ABS, which is also fairly low in price point but is tougher and lighter than PLA even though it is slightly weaker and less rigid, PETG, which is very strong but very difficult to work with and expensive, and TPU, which is a flexible filament that can withstand a lot of pressure before breaking.

OPENING WEEK SALE!
